ECLIPSE OF INTENTIONS

Carefully selected pieces of tree bark, gilded in a shimmering bronze hue, are meticulously arranged on a matte black circular wood panel in the shape of a crescent.

They catch the light, like the first sliver of a solar eclipse glowing with quiet intent, beckoning the viewer into a moment of cosmic stillness.

Here, time and nature converge in perfect suspension, reminding us that every intention, like the phases of the moon, has its moment to shine before fading into the unknown, only to be reborn again.
